I always loved and enjoyed reading books about how to be successful in life, and so after seeing this book, I downloaded it. And after reading the book, there are actually 2 sets, the first book tells me about the habits that most successful people rely on, and the other set talks about how to discipline myself against procrastination. The best part of this book for me, is about how to discipline myself, how to focus, and the topic about delayed gratification. Those topics taught me how to reward myself on the right time. It also helped me to build a habit about patience, and being not complacent about the investments that I make. I enjoyed reading these two sets of book, and it was informative for me.

This is a great success book, I love this book, It caught my attention from the first page. This book contains lots of information and guidelines that can help in achieving success in every life endeavor. It touches every aspect of life from money management skills, how to communicate with people around either in working environment or not, and how to move on after a downfall. It contains lots of great success tips and i really recommend this book. A very good read for me.

I personally think that the book is inspirational and has good discussion in it. I do believe that our minds are very powerful and once we set our minds to our goals or to what we want to do it, it has a higher chance to achieve success. The book is a good deal because the readers get to have 2 books in a price of one. Overall, it is inspiring and would really help a lot of people in focusing on their desired success.
